Re: Public Records Act Request

Dear Mr. Lutz:

This responds to the letter you sent to our office, received May 28, 2019. Specifically, you stated that you had not yet received a response to a letter you sent on March 17, 2019.

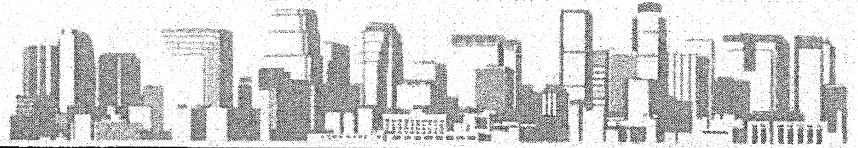

A response letter was sent to you on April 9, 2019 at 3:59 PM. Attached are hard copy print outs of the correspondence.

Should you have additional questions, please forward those to our office for further review.

Respectfully,

DEAN C. LOGAN
Registrar-Recorder/County Clerk

Re: Public Records Act Request

Dear Mr. Lutz:

This responds to both the letter you sent to our office, as well as the Public Records Act request, received March 22, 2019. Specifically, you requested the following:

"...provide the computer result for the early VBM ballots, broken down by batch, and the later VBM ballots, if that is available."

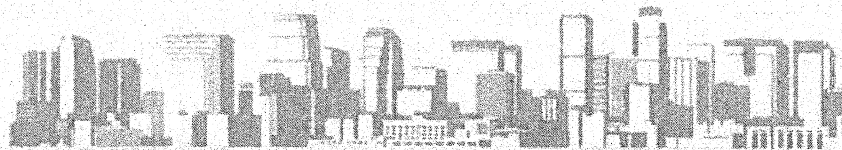

Please be advised that, pursuant to Government Code section 6253(c), additional time up to fourteen (14) days is needed to respond to your request based on the existence of unusual circumstances. Such unusual circumstances include the need to search for, collect, and appropriately examine separate and distinct records that are demanded in the request. We expect to provide you with a determination on or before April 15, 2019 as to whether or not we are able to identify any disclosable public records responsive to the terms of your request.

Thank you for your patience. If you need any assistance, please feel free to contact me at (562) 462-2833.

Respectfully,

DEAN C. LOGAN
Registrar-Recorder/County Clerk

Re: Public Records Act Request

Dear Mr. Lutz:

This responds to both the letter you sent to our office, as well as the Public Records Act request, received March 22, 2019. Specifically, you requested the following:

"...provide the computer result for the early VBM ballots, broken down by batch, and the later VBM ballots, if that is available."

The Registrar-Recorder/County Clerk does not have any responsive documents to your request.

During tabulation, Tally does not generate batch results and then compute election results by summarizing batch results. It generates results by precinct and then summarizes the precinct results. During production Tally processing, each tabulation event tabulates the complete set of Cast Vote Records (CVR) in the official CVR database. To obtain batch-level results for audit purposes, a Box Tabulation Report is generated for a box of ballots identified by the audit. This report queries the CVRs associated with the box and tabulates directly from the official Cast Vote Record database, just as the official election results are, but is a separate tabulation event from the one that produced the official results.

Should you have additional questions, please forward those to our office for further review.

Respectfully,

DEAN C. LOGAN
Registrar-Recorder/County Clerk
